EU AI ACT · REG (EU) 2024/1689

AI System Register

*A working compliance instrument
for European SMEs and DPO consultants*

TWENTY COLUMNS · FIVE EXAMPLES · ONE WORKBOOK

should equip providers deployers and affected persons AI literacy should

Which AI systems does your organisation run?

*And which risk tier
does each one sit in?*

Every AI Act obligation presupposes the same thing — that you know the answer. Article 5 prohibitions, Article 4 literacy, Article 50 transparency, Annex III high-risk. Without an inventory, the compliance posture has nothing to attach to.

Five components. One workbook.

01 Register sheet

Twenty mandatory columns plus ten optional — validations built in

02 Decision-tree sheet

Article 5 first, then Annex I, then Annex III with 6(3) tested

03 Worked examples

Five real SME deployments walked end-to-end

04 Instructions sheet

Scope, the one-row-per-purpose rule, common errors

05 Quickstart PDF

Orientation in ten minutes

Classification, in order.

Article 5 first — because violations are non-remediable.

01 Article 5 prohibitions

absolute, in force since Feb 2025

02 Annex I product safety

high-risk via product legislation

03 Annex III categories

with Article 6(3) derogation tested

04 Article 50 overlays

transparency, attaches to any tier

05 GPAI chapter V

parallel track, primarily upstream

Profiling closes the 6(3) derogation.

HR CV-screening tool.

Walked through the tree in six lines.

- **Q3.4 fires** — Annex III §4(a), recruitment screening
- **Art. 6(3) derogation?** — profiling closes it
- **Classification** — high-risk Annex III
- **FRIA** — not mandatory for §4 in private sector
- **DPIA** — required under GDPR Art. 35
- **Application date** — 2 December 2027 per Digital Omnibus

Four more examples in the workbook.
